

Client Information

The ETeam consists of:

Gerard Alberts, Stuart Donaldson, Cory Fagan, Robert Hadden, Diana Monea, Chris Rozell,
Eleanor Stein, Anne Woolliams

MEDICO-LEGAL FEE SCHEDULE 2018 for RESIDENTS OF CANADA

The cognitive testing + psychiatric/medical evaluation form the core of the ETeam services. The ETeam also offers additional optional evaluations of specific symptom areas.

A physician referral is required. Please discuss the the list of services with your physician and decide which are applicable to your clinical profile and objectives. Prior to booking your ETeam assessment, Dr. Stein will speak with you and/or your physician by phone to confirm that you have selected tests that appropriate to your symptoms and objectives.

The ETeam assessment provides objective data from multiple, independent professional sources that may bring greater understanding and validate the types and extent of symptoms, abilities and impairments you experience. We provide a written summary of test findings as well as recommendations for improving quality of life including both traditional and alternative management strategies.

ME/CFS, FM, MCS and the consequence of toxic exposures are chronic conditions. Symptoms may or may not improve as a result of this assessment. **Disclaimer** - We cannot predict or guarantee that the ETeam evaluations will prove you have a measurable impairment.

Most of the services provided by a medical doctor, such as the psychiatrist on the team, are covered by Alberta Health Care. Unfortunately, the services provided by the other Eteam professionals are not covered by Alberta Health Care. In some cases, limited reimbursement may be available through extended health care plans such as Blue Cross or private insurance programs through employee benefits plans.
