**Gerard Alberts, Stuart Donaldson, Cory Fagan, Robert Hadden,
Diana Monea, Chris Rozell, Eleanor Stein & Anne Wooliams**

ETeAM ASSESSMENT INFORMATION and 2018 FEE SCHEDULE for RESIDENTS OF ALBERTA with valid Alberta Health Care Card

The cognitive testing and psychiatric/medical evaluation form the core of the ETeam services. The ETeam also offers additional optional services. **Please discuss the list of services with your physician and together decide which may be applicable to your clinical profile and objectives.** Prior to booking your ETeam assessment, Dr. Stein will speak with you and/or your physician to confirm that you have selected tests that are appropriate for your symptoms and objectives.

The ETeam is a group of independent professionals, each expert in his/her own field. Each team member assesses you independently and then discusses your results with the other team members to provide you with an integrated ETeam report summarizing the main test findings, diagnoses and functional capacity as well as symptom management recommendations.

The ETeam assessment provides objective data from multiple professional sources that may bring greater understanding and validation of your experience. Symptoms may or may not improve as a result of this assessment. After receiving your ETeam report, your physician may contact any team member to discuss the results and recommendations.

A physician referral is required. Most of the services provided by a medical doctor, such as the psychiatrist on the team, are covered by Alberta Health Care. The services provided by the other Eteam professionals are not covered by Alberta Health Care. In some cases, limited reimbursement may be available through extended health care plans such as Blue Cross or employee benefits plans.

Depending on your symptoms and needs, further consultation and research may be recommended, which may incur additional fees. These will be discussed with you before proceeding. All team members work within the central Calgary area. For out of town clients, we attempt to arrange all appointments within a week timeframe. You are responsible for your own travel and accommodation arrangements and costs.

Disclaimer: We cannot predict or guarantee that the ETeam evaluations will identify a measurable impairment or diagnoses that you may expect.
